SUMMARY

Software Engineer and M.S. Computer Science graduate researcher, experienced in full-stack development, system programming, and database integration. Establish competence in C++, Python, Java, and Oracle EBS environments. Hands-on experience building REST APIs, interactive systems, data integration pipelines, and computer vision systems.

PROFESSIONAL EXPERIENCE

Oracle Developer

Kuwait City, Kuwait

Diyar - Diyar United Company

November 2025 – Present

- Optimize **SQL** calls and refactored code workflow across **80+ REST APIs**, improving response times and reliability.
- Manage and maintain **4+ Oracle EBS** custom schemas encompassing numerous **PL/SQL** packages, procedures and functions.
- Troubleshooting cross-schema integration issues including privilege grants, synonym management, and package compilation across **3+ Oracle schemas**, ensuring seamless **API connectivity**.
- Build and maintain **50+ JAX-RS REST** endpoints integrating mobile applications with **Oracle EBS HR** module through **JDBC** callable statements.

Data Analysis

Los Angeles, CA

KIA - Trophy Automotive Dealer Group

July 2025 – October 2025

- Analyzed **16 months** of historical data using CDK Drive to identify gaps in reporting **workflows**, leading to enhanced **data accuracy** and streamlined reporting processes
- Consolidated **100+** data from myKaarma, CDK Drive, and Kdealer+ to build unified vehicle and customer profiles, enabling advisors to make **faster data-driven** decisions

Teacher Assistant

Pomona, CA

Computers and Society - California Polytechnic State University Pomona

March 2025 – May 2025

- Assisted professor with lectures and **managing** course materials for an undergraduate level for **50 students**
- Graded assignments and exams for over **50 students**, providing constructive feedback to **support** their academic growth

PROJECT EXPERIENCE

Game Development

Pomona, CA

Club Project - [Rolling Knight](#)

June 2024 – December 2024

- Co-led **6-person** Team over a full semester to design and ship a **2D Unity Platformer**, explicate role splits, maintaining communication using platforms like **Discord and Github**, and managed version control via **Git**.
- Personally authored **30%** and reviewed **90%** of the codebase in **C#**, spanning game design, physics-based movement, level design, asset integration, debugging and performance.
- Contributed across multiple functions in the project throughout the **6 month development cycle**, stepping in to assist teammates in level design, music, character design, story, code troubleshooting.

Computer Vision - Masters Program

Pomona, CA

Random-Order UAV Image Stitching System

June 2024 – May 2025

- Designed and implemented novel random-order **UAV image** stitching algorithm in **C++ (OpenCV)**, applying **SIFT** feature detection with **RANSAC**-based homography estimation to reconstruct land cover maps from **GPS-corrupted** drone images — achieving up to **40% lower RMS error** versus **ORB-based** methods.
- Benchmarked and compared competing algorithms (**SIFT vs. ORB**) over **100+** images creating multiple datasets using **RMS** and **SSIM** metrics, with **SIFT's RMS** ranging **14-72** vs. **ORB's 16-126** — providing data-driven justification for final decisions.
- Identified and solved an underexplored computer vision problem, and proposed a **CUDA/CPU parallel architecture** projected to deliver a **~60% runtime reduction** — laying groundwork for **real-time UAV mapping** applications.

SKILLS

- **Languages/Frameworks:** C/C++, Java, PL/SQL, Python, JavaScript, CUDA, JAX-RS, JDBC, REST APIs, JSON
- **Database:** Oracle EBS, Oracle Database, Oracle HRMS, Oracle Workflow
- **IDE Software:** Eclipse, Visual studio, MySQL WorkBench, Apache NetBeans, Unity, SQL Developer, JDeveloper
- **Developer Tools:** Git, Windows, Linux, Postman, SQL*Plus, TOAD

EDUCATION

California Polytechnic State University Pomona

Pomona, CA

M.S. Computer Science

January 2023 - May 2025

GPA: 3.88

- **Relevant Coursework:** Parallel and Distributed algorithms, Digital Image Processing, CUDA, Game Development, Scheduling Algorithms, Advanced Computer Architecture, Advanced Software Engineering

California State University Dominguez Hills

Carson, CA

B.S. Computer Science - Honors

January 2021 - December 2022

GPA: 3.6

- **Relevant Coursework:** Data Management, Advanced Programming Languages, Finite Automata, Computer & Society, Analysis of Algorithms, Data structures, Operating systems, and Security Engineering
